MISSION

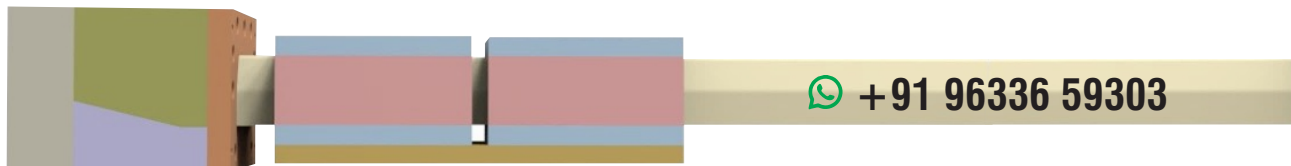

We will achieve excellence through managerial effectiveness to ensure the fulfilment of our core values.

VISION

To become the preferred manufacturing company for the Polymer Process Industry providing world-class products to satisfy customers through continual improvement driven by the integrity, teamwork and creativity of our people.

Our Values

Satisfaction of Internal & External Customers
Cordial Work Environment
Continual Improvement (Including Excellence in manufacturing)
Business Development – Customer / Product / Service / Vendor
New Initiatives/Innovation in Product and Process

We are total solutions provider in the field of

- Product Design
- Tool Design and Development
- Manufacturing & Assembly of Plastic & Metal components and Rubber parts.
- Polymer selection and application
- Product cost optimization
- Innovative ideas
- Prototype moulds
- Extrusion Dies
- Injection and Blow moulding Dies

Our Die Range Complete solution provider in Injection Moulding

Maharaj Tools & Dies is one of the leading solution provider for injection mould industry. We have various experts in PVC & Plastics mould. We have household moulds, automobile moulds, material handling moulds, furniture moulds, industrial moulds, plumbing moulds and blow moulds.

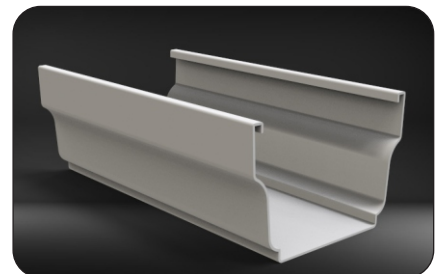

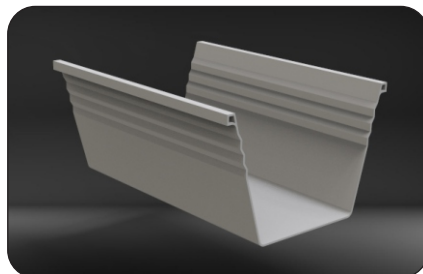

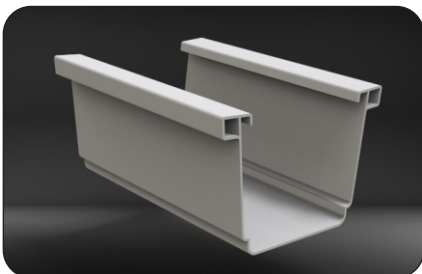

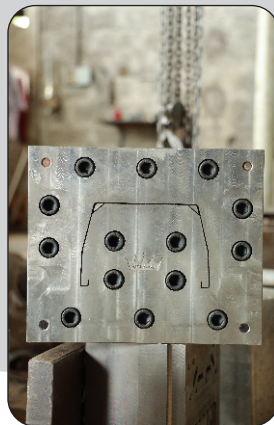

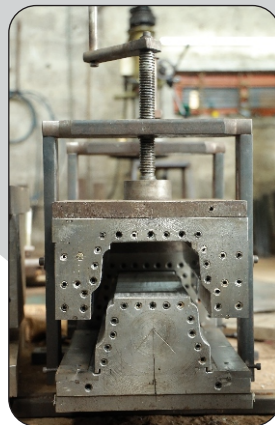

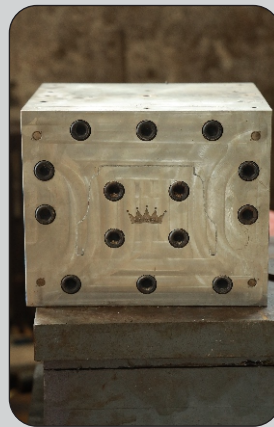

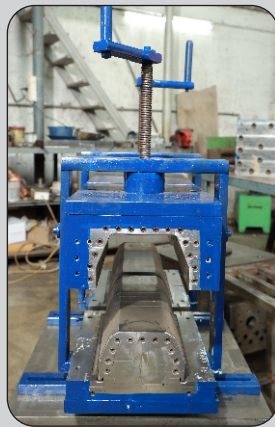

WE offer products and services are magnificently provided using the best grade raw material and sophisticated techniques in accordance with the international quality standards. Widely acknowledged among clients for their features, these products and services are tested on various parameters by our quality controllers.

Our Die Range Complete solution provider in Extrusion Dies

Maharaj Tools & Dies offers many cost saving opportunities for extrusion manufacturers of pipe products, square water gutter. With nearly two decades of experience in producing extrusion tooling for plastics in India and abroad. Our company has developed a number of tooling features leading to unique solutions for the extrusion process. Contact Maharaj Tools & Dies to prepare a proposal for cost reduction and quality improvements, Die expert to evaluate your current production methods with intent to offer process improvement possibilities.

If you,

- Want full technical support,
- Want your requirements to be met quickly.
- Expect market-oriented and cost-effective solutions.
- Prefer flexibility.
- Expect quality and precision.
- Appreciate reliability and faithfulness to the given commitments.
- Require material compliance &
- Prompt service.

Then Maharaj Tools & Dies

Complete solution provider

in Injection Moulding and Extrusion Die
